We will continue our business with the aim of creating a comfortable environment for both people and nature.

Shinsou Construction was established in May 1974 with civil engineering, marine civil engineering, dredging and land construction as the main business. As a construction company that provides high-quality technical services to public and private companies with the experience and technology cultivated so far, strengthens and improves construction technology to maintain and restore social infrastructure, and thoroughly implements a safety management system, we will do our best to fulfill our social responsibility.

若築建設

<https://www.wakachiku.co.jp/>
Our company is a company of
Wakachiku Construction Group.

Message from the President

Our company was established in 1974 under Wakachiku Construction Co., Ltd., which is known as a pioneer in the marine civil engineering work, with general civil engineering work, offshore civil engineering and dredging / landfill work reclamation as the main business.

Since then, for over 47 years, we have accumulated technologies and experiences to preserve and restore social infrastructure and have developed businesses such as the constructions of port facilities and airport facilities, and the development of urban infrastructure.

In the future, we will strive to fulfill our social responsibilities as a construction company by further strengthening and improving construction technologies and thoroughly implementing safety management systems. We would appreciate your continued support in the future.

Representative Director Takashi Kichise
